

# VenetianBlinds 1.0.0

www.leafpictures.de

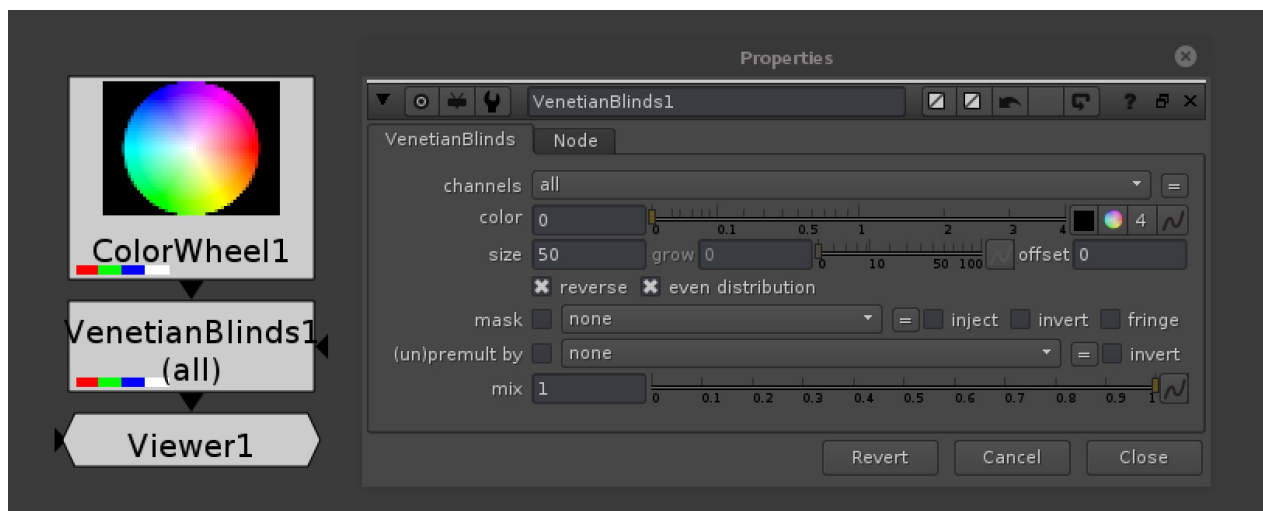

Simon Jokuschies

Create a venetian blinds effect by creating blank lines within the given input image.  
Similar to the VenetianBlinds effect in Adobe AfterEffects.

## Result

## Knobs

**color**

Color to assign to the blinds.

**size**

The size of the blinds.

**grow**

Grow the blinds by an additional value. Must be in non even distribution mode.

**offset**

Offset the blinds by the given value.

**reverse**

Reverse the sections between image and blinds.

**even\_distribution**

If turned on, the distance between blinds and underlying image stays the same. If turned off, you can use the *grow* slider to change the size of the blinds. Use the *reverse* checkbox to reverse the image and blinds.
